Replika pistoletu SSP5 Green Gas - Novritsch

Cena	**1 199,00 zł**
Dostępność	**Na zamówienie**
Czas wysyłki	**7 dni**
Producent	**NOVRITSCH**

Opis produktu

If you prefer a delivery method other than in-store pickup, feel free to contact us by phone at 533-742-742 or by e-mail at sklep@soldiersasg.pl

Sale subject to confirmation of availability with the supplier.
After purchase, we will contact you to confirm the details.

Novritsch SSP5 – GBB Pistol Replica

A GBB replica that changes how you approach pistol play. The Novritsch SSP5 was designed in Vienna by airsoft players. A one-piece 6.01 mm TDC hop-up chamber handles heavy BBs up to 0.40 g, while the fully CNC-machined aluminium slide, steel trigger assembly and a fast, short recoil deliver durability and quick follow-up shots. Available in three lengths, so you can match it to your playing style.

Available length versions:

4.3 inch 5.1 inch 6 inch

Three versions – which one to choose?

All versions share the same foundations and differ in size, power and purpose. The magazine holds 27 BBs, and weights are given with the magazine.

Muzzle energy	below 1 J	1–1.2 J	1–1.5 J
Recommended BBs	0.28 g	0.32 g	0.40 g (long range) / 0.32 g (CQB)
Inner barrel	110 mm	130 mm	150 mm
Length	202 mm	219 mm	254 mm
Weight with magazine	981 g	1013 g	1070 g

4.3 inch – for close quarters

- Power below 1 J (0.25–0.40 g BBs, Green Gas), recommended BBs 0.28 g.
- Perfect for CQB, IPSC compliant.
- Great gas efficiency and portability – best as a secondary.

5.1 inch – the all-rounder

- Power 1–1.2 J (0.25–0.40 g BBs, Green Gas), recommended BBs 0.32 g.
- IPSC compliant, standard Hi-Capa size.
- Good portability and mobility, and better gas efficiency thanks to lower power.
- The do-it-all version, still comfortable in the holster.

6 inch – the primary

- Power 1–1.5 J (0.25–0.40 g BBs, Green Gas), recommended BBs 0.40 g for long range and 0.32 g for CQB.
- Long 6 inch barrel and more weight – best as a primary.
- Reliable, high-performing and very accurate, with a loud, distinct shot sound.
- Easy to control thanks to the fast recoil.

Accuracy – fixed barrel and TDC hop-up

One-piece 6.01 mm TDC chamber. Instead of two parts, the chamber is a single piece, which gives better air seal, durability and alignment. The replica handles heavy BBs up to 0.40 g and fires them at up to 1.5 J (6 inch version) through a 6.01 mm precision inner barrel.

Fixed outer barrel. An accurate pistol can't have a barrel that moves around. The manufacturer took the SSP18 FXB solution further and clamped the upper and lower together, so the barrel has no wobble.

TDC hop-up adjusted with a 2 mm key. The strengthened hop-up chamber has a solid, concave nub (the part that presses on the hop-up bucking from above and gives the BB backspin, so it flies further and more stably). The nub moves 100% vertically, with no pivoting, so the pressure on the bucking is even and repeatable. You set the hop-up with a 2 mm Allen key.

Fast, light slide system

The lightest slide assembly on the Hi-Capa market. The slide assembly weighs only 66 g, which improves gas efficiency. The slide has a built-in short stroke, and the polymer blowback unit has a short stroke for the nozzle, ensuring reliable feeding.

Unique split-slide solution. The recoil is snappy yet easy to control, so you can fire several precise shots quickly.

Optimised cycle timing. A short stroke makes the gun shoot faster by shortening the distance the slide has to travel, but other inner parts must be adjusted to match. The manufacturer has done this at the factory, so the whole system runs reliably at high speed.

Durability and construction

- fully CNC-machined aluminium slide – lighter, stronger and more precise than cast slides
- hybrid construction: polymer and aluminium where it matters

- full steel trigger assembly
- steel sears, hammer and hammer post
- plenty of CNC machining and tight tolerances
- unique serial number

Expansion and accessories

The SSP5 has a Picatinny top rail, a competition charging handle, coloured CNC parts, HPA adapters and red dot mounting. The red dot sits very low, and you can set the pistol up with iron sights, just a red dot or both at once. The frame comes pre-drilled with 5 holes for a minimalist universal holster and accessory mount. The manufacturer also announces carbine kits, an integrated tracer unit and more coloured parts.

⚠ Gas and CO2 magazines

Use BBs and gas suited to your version of the replica (see the table above). CO2 magazines should only be used with the SSP5 below 15°C.

Manufacturer support and resources

The manufacturer has prepared an extensive video library with courses and guides (Novritsch Academy). The replica was designed in Vienna, where the technical support team of airsoft players is also based. All spare parts are available.

In the box

- Novritsch SSP5 replica
- 27-round magazine
- valve tool
- 2 mm hex key
- manual

Technical specifications

Manufacturer	Novritsch
Model	SSP5
Power source	Gas blowback (GBB, Green Gas)
Versions	4.3 inch / 5.1 inch / 6 inch
Muzzle energy	below 1 J / 1–1.2 J / 1–1.5 J
Magazine capacity	27 BBs
Recommended BBs	0.28 g / 0.32 g / 0.40 g (0.32 g in CQB)
Inner barrel	6.01 mm; 110 mm / 130 mm / 150 mm
Hop-up	TDC, adjusted with a 2 mm key
Hop-up chamber	One-piece
Outer barrel	Fixed
Slide	CNC-machined aluminium, 66 g (slide assembly)
Frame	Polymer / aluminium hybrid
Trigger assembly	Full steel
Rail	Picatinny on the slide
Length	202 mm / 219 mm / 254 mm
Weight with magazine	981 g / 1013 g / 1070 g
IPSC compliant	Yes (4.3 inch and 5.1 inch)
CO2 magazines	Only below 15°C
Design	Vienna, Austria
